

## Now it's your turn

**Please note:** You can fill this in later if nothing comes to mind right away. It is far more important to get a good feel for this card than it is to write something in right away.

What is your interpretation? What does this card say to you?

---

---

---

What does it say to you when it is *reversed*?

---

---

---

If you saw this card as an “end result,” what would you say to your client?

---

---

---

**How would you use this card as an “affirmation helper”?** Keep in mind that each card is extremely valuable as an assistant in your “*Laws of Attraction and Repulsion*” exercises. Any time you *desire* something intensely, **or** find yourself in a situation *you want out of*, you can use the imagery of your chosen card (or recommend this to your clients) to enhance your visualizations and “speed up” your results. Of course, much, much more of this is covered in depth in our *Advanced Tarot Secrets* course and workbook if you choose to learn even more about the Tarot.
