

Extra credit exercises

(three-card practice spreads)

Please draw the cards from your deck that correspond to the images below. Then simply fill in the blanks. Remember that your answers are just as valid as anything you read anywhere, as long as *they work for you*.

These three cards came up in a spread. What do they say to you? What do you see? You can direct these cards to any situation that you feel they apply.

What are the meanings of each card (at this particular moment, *according to you*)?

What do these three cards have in common? (*if anything*)

How would *card one* get to *card three*? What is happening here?

_____ *This happens* _____ (*and then*) _____ *this other thing happens* _____ (*and then*) _____ *this other thing happens.*

If *card one* (the one on the left) were the primary card, how would *cards two* and *three* aspect *card one*? How would they “*shape*” or *clarify* *card one*?

If *card two* or *three* were the primary card, how would the other cards aspect that card? How would they “*shape*” or *clarify* it?

If you *blended* these three cards into one meaning, what would the *new meaning* be?

Any other thoughts or opinions you would like to add? *Perhaps something we may have missed?*
